

UVLT Chestnut Challenge

Data to Collect

1. Make sure you don't have your location services turned off.
2. In iNaturalist make Observation with at least one photo.
3. In comment put seedling or approximate diameter if not seedling.
4. In comments say if you found nuts, (note if burrs and/or nuts) – look around, they are a favorite food.
5. In comments put approximate height if possible.
6. In comments if possible note if you think you see any signs of fungus (canker, fungus fruiting bodies, all nuts deformed).
7. In comments simple description of surrounding habitat (in open cut are, mature forest, next to road or trail, hardwood or mixed wood forest).
8. Save, you must do this each observation.
